Appendix J Quality Assurance Project Plan and Quality Management Plan Checksheets

The following forms will be used to review all Quality Assurance Project Plans and Quality Management Plans in which environmental data collection activities are GLNPO's responsibility. These forms are very similar to review forms used in EPA Regions 10 and 3.

A1.	Title & Approval Sheet						
	Title						
	Organization's name						
	Dated signature of project manager						
	Dated signature of QA officer						
	Other signatures, as needed						
A2.	Table of Contents						
A3.	Distribution List						
A4.	Project/Task Organization						
	Identifies key individuals with their responsibilities (e.g., data users, decision makers, project QA manager, Subcontractors, etc.) Organization chart shows lines of authority & reporting responsibilities						
A5.	Problem Definition/Background						
	Clearly states problem or decision to be						
	resolved						
	Historical & background information						
A6.	Project/Task Description						
	Lists measurements to be made						
	Cites applicable technical, regulatory, or program-specific quality standards, criteria, or objectives						
	Notes special personnel or equipment requirements						
	Provides work schedule						
	Notes required project & QA records/reports						
A7.	Quality Objectives & Criteria for Measurement Data						
	States project objectives and limits, both qualitatively & quantitatively						
	States & characterizes measurement quality objectives as to applicable action levels or criteria						
A8.	Special Training Requirements/Certifications						
A9.	Documentation & Records						
	Lists information & records to be included in data report (e.g. raw data, field logs, results of QC checks, problems encountered) States requested lab turnaround time						
	Gives retention time and location for records and reports						

IA = Included & Acceptable NI = Not Included IU = Included & Unacceptable NA = Not Applicable	IA	IU	NI	NA	COMMENTS	PAGE 3 OF 5
B1. Sampling Process Design (Experimental Design)						
Types and number of samples required						
Sampling network design & rationale for design Sampling locations & frequency of sampling						
Sample matrices						
Classification of each measurement parameter as either critical or needed for information only						
Validation study information, for non- standard situations						
B2. Sampling Method Requirements						
Identifies sample collection procedures & methods						
Lists equipment needs						
Identifies support facilities						
Identifies individuals responsible for corrective action						
B3. Sample Handling & Custody Requirements						
Notes sample handling requirements						
Notes chain of custody procedures, if required						
B4. Analytical Methods Requirements						
Identifies analytical methods to be followed (with all options) & required equipment						
Provides validation information for non- standard methods						
Identifies individuals responsible for corrective action						
B5. Quality Control Requirements						
Identifies QC procedures & frequency for						

each sampling, analysis, or measurement technique, as well as associated acceptance

References procedures used to calculate QC statistics (e.g., precision, bias, accuracy)

Identifies acceptance testing of sampling and

Describes equipment needing calibration and

Notes availability & location of spare parts

criteria and corrective action

B6. Instrument/Equipment Testing, Inspection, and Maintenance Requirements

frequency for such calibration

measurement systems

IU = Included & Unacceptable NA = Not Applicable	IA	IU	NI	NA	COMMENTS	PAGE 4 OF 5
B7. Instrument Calibration & Frequency						
Identifies equipment needing calibration and						
frequency for such calibration						
Notes required calibration standards and/or	+					
equipment						
Cites calibration records & manner traceable	+					
to equipment						
B8. Inspection/Acceptance Requirements for						
Supplies & Consumables						
States acceptance criteria for supplies &						
consumables						
Notes responsible individuals						
B9. Data Acquisition Requirements for Non-Direct						
Measurements						
Identifies type of data needed from non-						
measurement sources (e.g., computer data						
bases and literature files), along with						
acceptance criteria for their use						
Describes any limitations of such data						
•						
B10. Data Management						
Describes standard record keeping & data						
storage and retrieval requirements						
Checklist or standard forms attached to QAPP						
Describes data handling equipment &						
procedures used to process, compile and						
analyze data (e.g., required computer						
hardware & software)						
C1. Assessments & Response Actions						
Lists required number, frequency, & type of						
assessments, with approximate date & names						
of responsible personnel						
Identifies individuals responsible for						
corrective actions						
C2. Reports to Management						
Identifies the preparer and recipients of						
reports						
Identifies frequency and distribution of						
reports for:						
Project status						
Results of performance evaluations & audits	+					
*	<u> </u>					
Results of periodic data quality assessments						
Any significant QA problems						
, , , ,	<u> </u>	<u> </u>	<u> </u>	<u> </u>		

IA = Included & Acceptable NI = Not Included						
IU = Included & Unacceptable NA = Not Applicable	IA	IU	NI	NA	COMMENTS	PAGE 5 OF 5
D1. Data Review, Validation, & Verification						
States criteria for accepting, rejecting, or qualifying data						
Includes project-specific calculations or algorithms						
D2. Validation and Verification Methods						
Describes process for data validation and verification						
Identifies issue resolution procedure and responsible individuals						
Identifies method for conveying these results to data users						
D3. Reconciliation with User Requirements						
Describes process for reconciling with DQOs and reporting limitations on use of data

A1. Management & Organization					
Title Page					
Organization's name					
Dated signature of project manager					
Dated signature of QA officer					
Other signatures, as needed					
A2. Organization's QA Policy Statement					
Importance of QA and QC					
General objectives and goals of a quality system					
Policy for resource allocation for the quality system					
A3. Distribution List					
Identifies key individuals with their responsibilities (e.g., data users, decision makers, project QA manager, Subcontractors, etc.)					
Organization chart shows lines of authority & reporting responsibilities					
A4. QA Manager/Staff Authorities					
Documents the organizational independence of the QA Manager from groups generating, compiling, and evaluating environmental data Indicates how the organization will ensure that QA personnel will have access to the appropriate levels of management in order to plan, assess, and improve the organization's quality system					
A5. Technical Activities/Programs					
States the specific programs that require quality management controls					
States where oversight of delegated, contracted, or other extra mural programs are needed to assure data quality States where and how internal coordination of QA and QC activities among the group's					
organizational units needs to occur

P1 Quality System Companents					
B1. Quality System Components					
Description of the organization's quality system					
B2. Principle Components					
A description of the principle components					
of the organization's quality system in					
terms including the roles and					
responsibilities of management and staff: Quality system documentation					
Annual systems review					
Management assessments					
Training					
Systematic planning of projects					
Project-specific quality documentation					
Project and data assessments					
B3. Tools for Implementing Components					
QMP's					
Quality system audits					
Training plans					
QAPP					
Data verification and validation					
A list of components of the organization that					
develop QAPP's in support of the					
organization's quality system and the review					
and approval procedures for such					
documentation					
A discussion of how roles and responsibilities for the principal components of the quality					
system are incorporated into performance					
standards					
C1. Personnel Qualification & Training					
A statement of the policy regarding training					
for management and staff					
A description of the process(es), including					
the roles, responsibilities, and authorities of management and staff for:					
Identifying, ensuring, and documenting that					
personnel have maintained the appropriate					
knowledge, skill, and statutory, regulatory,					
professional or other certifications,					
accreditation, licenses, or other formal					
qualification necessary Identifying the need for retraining based on					
changing requirements					
L Changing requirements	<u> </u>			<u>!</u>	<u> </u>

D1. Procurement of Items & Services					
Describes or references the process(es), including the roles, responsibilities, and authorities of management and staff, pertaining to all appropriate procurement documents or extra mural agreements, including grants, cooperative agreements, and contracted and subcontracted activities, involving or affecting environmental programs					
D2. Procurement Document Approval					
Reviewing and approving procurement documents to ensure that procurement documents are accurate, complete, and clearly describe:					
The item or service needed					
The associated technical and quality requirements					
The quality system elements for which the supplier is responsible					
How the supplier's conformance to the customer's requirements will be verified					
D3. Solicitation Response Approval					
Review and approval of all applicable responses to solicitations to ensure that these documents:					
Satisfy all technical and quality requirements					
Provide evidence of the supplier's capability to satisfy EPA quality system requirements as defined in the extra mural agreement or applicable Federal Regulation					
Ensuring that procurement items and services are of acceptable quality, including the review of objective evidence of quality for applicable items and services furnished by suppliers and subcontractors, source selection, source inspections, supplier audits, and examination of deliverables Review and approval procedures for mandatory quality-related documentation (e.g., QMP's or QAPP's) from suppliers					
Policies and criteria for delegations of EPA authority to review and approve mandatory quality-related documentation (e.g., QMP's or QAPP's) from suppliers consistent with Chapter 2.2 of EPA Order 5360

E1. Documents and Records					
Describes or references the process(es)					
including roles, responsibilities, and					
authorities of management and staff for:					
Quality-related documents and records					
requiring control					
Records and documents accurately reflect					
completed work					
Established chain of custody					
Ensure compliance with all applicable					
statutory, regulatory, and EPA requirements					
for documents and records					
Establish and implement confidentiality					
procedures for evidentiary records					
F1. Computer Hardware and Software					
<u> </u>					
Describes or references the process(es)					
including roles, responsibilities, and					
authorities of management and staff for:					
Assessed and documented the impact of					
change to user requirements and/or the					
hardware and software					
Evaluated purchased hardware and software to					
ensure it met user requirements and complied					
with applicable and contractual requirements					
and standards					
Ensured that data and information produced					
from, or collected by, computers met					
applicable information resource management					
requirements and standards					
Developed, installed, and tested documenting					
hardware and software used in environmental					
programs to ensure it met technical and quality					
requirements and directives from management					
Ensured that applicable EPA requirements for					
information resources management were					
addressed

that the changes are made as prescribed							
11. Assessment and Response							
Describes or references the process(es)							
including roles, responsibilities, and							
authorities of management and staff for:							
Assesses the adequacy of the quality system at least annually		or the quality system at					
Plans, implements, and documents		and documents					
assessments and reporting assessment results							
to management including how to select an							
assessment tool, the expected frequency of							
their application to environmental programs,							
and the roles and responsibilities of the							
assessors	assessors						

IA = Included & Acceptable NI = Not included IU = Included & Unacceptable NA = Not Applicable	IA	IU	NI	NA	COMMENTS
Determines the level of competence, experience, and training necessary to ensure that personnel conducting assessments are technically knowledgeable, have no real or perceived conflict of interest, and have no direct involvement or responsibility for the work being assessed					
Ensures that personnel conducting assessments have sufficient access to programs, manager, documents, and records Management's review and response to					
assessment					
Identifies how and when corrective actions are to be taken in response to the findings of the assessment, ensuring corrective actions are made promptly, confirming the implementation and effectiveness of any corrective action, and documenting such actions					
Addresses any disputes encountered as a result of assessments					
J1. Quality Improvement					
Identify who (organizationally) is responsible for identifying, planning, implementing, and evaluating the effectiveness of quality improvement activities and describes the process to ensure continuous quality improvement, including the roles and responsibilities of management and staff					
Ensures that conditions adverse to quality are:					
Prevented					
Identified promptly including a determination of the nature and extent of the problem					
Corrected as soon as practical, including implementing appropriate corrective actions and actions to prevent reoccurrence Documenting all corrective actions					
Tracking such actions to closure					
Encourages staff at all levels to establish communications between customers and suppliers, identify process improvement opportunities, and identify and offer solutions to problems
